**TAGLINE:** The ultimate multi-device charging station

### WHAT IS THE PRODUCT?

ChargeHub features multiple-port USB charging stations which provide the brand's patented SmartSpeed® Technology to each connected device and make maintaining multiple devices charged at the same time easier than ever, by utilizing just one outlet.

In addition, the brand offers portable power banks and car chargers, functional for everyday use and always within reach if needed when an emergency arises.

### WHAT DOES THE PRODUCT DO?

1. SmartSpeed Technology simplifies and enhances multi-port USB charging by providing an optimal and safe charge to most devices. Simultaneously charge USB-connected devices at up to 2.4 amps per port or 4.4 amps overall with an impressive 54 watts of total power!
2. ChargeHub works with virtually any USB-enabled device, Type-C, or wireless-enabled device.

### HIT POINTS:

- Simplify multi-device charging with ChargeHub
- Upgrade your charging station at work or at home
- Perfect for charging phones, tablets, speakers, and more!

**WHY SHOULD THE AUDIENCE BUY IT?** ChargeHub provides the advantage of a single power supply. This helps you minimize the clutter by getting rid of clunky power strips and slow-charging wall adapters. These chargers put an end to the fight over the phone charger by charging multiple devices at the same time and into a single wall outlet.
