**TAGLINE:** [Deal.Tagline]

### WHAT IS THE PRODUCT?

**HEALR:** Leg compression massager with air bags applying strong force on your calves and feet; it's also a foot massager with heat to treat muscle soreness and fatigue; and it has a cold therapy function (special gel pads are included in the set) to deal with acute pain.

**NECKA:** Powerful shiatsu massager with two speeds for your neck and shoulders.

### WHAT DOES THE PRODUCT DO?

#### HEALR:

1. Calf and foot massage and air compression are important complements to whatever fitness program you're building and whatever your physical activity pattern is like.
2. This calves and feet massager uniquely features cold therapy on top of the leg compression and heat functions. The foot massager machine comes with 8 gel pads that you need to pre-cool in the freezer, then place in special pockets inside the leg massage device, and enjoy the relief of acute pain.
3. This muscle massager has an intuitive remote, so you can either rely on one of the three auto-modes or play with the settings. The foot and calf massager can work the two zones simultaneously or separately, and there are 4 levels of both pressure and heat to choose from. The automatic timer in this heated foot massager will ensure the optimal duration of your sessions.
4. With adjustable hook-and-loop fasteners, this leg and foot massager fits most sizes. The high-quality breathable rip-stop material that this portable calves and feet massager machine is made of will ensure its long life and, importantly, the comforting sensation against the skin.

#### NECKA:

1. It is powered by 8 deep-kneading nodes that simulate shiatsu finger pressure. Combines massage with heat therapy for more comprehensive effects.
2. Massages release endorphins, an amino acid that works as the body's natural painkiller. Alleviates soreness that results from exercising or chronic conditions
3. Remove stiffness: After a massage, your range of motion will also improve due to the removal of build-up lactic acid which causes stiffness in muscles
4. Alleviate Stress: Applying pressure on the muscles around your neck and shoulders helps to reduce muscular tension and ease day-to-day stress
5. NECKA massager for pain relief is made of high-quality materials (breathable, waterproof, easy to clean, eco-leather + a spare cover) that will last and ensure maximum comfort.

**HIT POINTS:**

- Smart-control your massage with remotes and different settings
- Get the value of many quality massages over time for less than the price of a spa visit
- Affordable massages accessible to everyone

**WHY SHOULD THE AUDIENCE BUY IT?**

**Reathlete** makes innovative massage products that combine different therapies for massages that are deeper, more effective, and most importantly more relaxing. Electric massagers require minimal effort from you while really helping you warm up before a workout, recover after one, improve blood flow, and relieve pain.

These were designed to make massage accessible to everyone!

Reathlete products are universal and will work for you regardless of activity level, and size.

**ADDITIONAL INFORMATION:**

Each product has easy-to-use, high-tech controls that make it easy to customize your massage and adjust settings as necessary.
