TAGLINE: Never lose your remote again

WHAT IS THE PRODUCT? It is an electronic accessory used to help find lost or misplaced remote controls.

WHAT DOES THE PRODUCT DO?

The Remote Retriever consists of a base and a tag, the base adheres to any stationary object, and the tag adheres to the remote. When you can't find the remote, press on the logo on the base. A blue light will show that it is looking for the tag. When the tag is located, the light will blink green and a sound will emit from the tag. When the remote control is found, return to the base and push on the logo to turn it off.

Custom-created audio tone with the perfect pitch optimized for the human ear to find your lost remote quickly.

Convenient LED light to help you know when the remote is located

Extremely easy set up

Works up to a 150 FT range

No smartphone, GPS, app Wi-Fi or subscription needed.

HIT POINTS:

- Find your remote at the touch of a button!
- Don't waste your time searching for the remote ever again.
- Easy to use for all ages.

WHY SHOULD THE AUDIENCE BUY IT?

Parents will never have to watch the same cartoon for five hours straight because the remote is lost. Haha!

No more blindly looking through cushions or blankets or toy boxes or dog beds to find the remote.

Kids will now love finding remotes that they misplaced. Just tell them to click the button and they will have a blast finding the remote!

No need to waste valuable time searching for your remote while missing your favorite show!

Let's face it, who even knows how to change the channel without a remote anyway.

Easy for all ages to use including seniors

ADDITIONAL INFORMATION:

Made of extremely durable plastic
